Volume 145 August 1984

CONTENTS

Thermoacoustic heating at the closed end of an oscillating gas column. N. Rott *page* 1

Interfacial shapes between two superimposed rotating simple fluids. H. A. Tieu, D. D. Joseph and G. S. Beavers 11

Generation of instability waves in flows separating from smooth surfaces. M. E. Goldstein 71

On inertial flow over topography. Part 2. Rotating-channel flow near the critical speed. L. J. Pratt 95

Source–sink flows of a stratified fluid in a rotating annulus. Jae Min Hyun 111

On the generation and evolution of internal gravity waves. Faiza S. Lansing and Tony Maxworthy 127

Solute transport in heterogeneous porous formations. Gedeon Dagan 151

The rate of coagulation of a dilute polydisperse system of sedimenting spheres. Robert H. Davis 179

The motion of a small sphere in fluid near a circular hole in a plane wall. Takeshi Miyazaki and Hidenori Hasimoto 201

Boundary conditions for high-shear grain flows. K. Hui, P. K. Haff, J. E. Ungar and R. Jackson 223

A note on the stability of columnar vortices. Kerry A. Emanuel 235

Stability and heat transfer of rotating cryogens. Part 2. Effects of rotation on heat-transfer properties of convection in liquid ^{4}He. J. M. Pfotenhauer, P. G. J. Lucas and R. J. Donnelly 239

Wind-induced entrainment in a stably stratified fluid. C. Kranenburg 253

Resonance in flows with vortex sheets and edges. Paul A. Durbin 275

Line momentum source in shallow inviscid fluid. Joseph H. W. Lee and Michael D. Greenberg 287

Large-scale structural effects in developed turbulent flow through closely spaced rod arrays. J. D. Hooper and K. Rehme 305

Turbulent flow with heat transfer in plane and curved wall jets. T. Dakos, C. A. Verriopoulos and M. M. Gibson 339

The influence of projecting sidewalls on the hydrodynamic performance of wave-energy devices. B. M. Count and D. V. Evans 361

Transition to geostrophic turbulence in a rotating differentially heated annulus to fluid. G. Buzyna, R. L. Pfeffer and R. Kung 377

Small-amplitude free-surface waves generated by moving oscillatory disturbances. A. K. Pramanik and S. R. Majumdar 405

A note on the instability of columnar vortices. Knut S. Eckhoff 417

An experimental study of the response of nearly isotropic turbulence to a spectrally local disturbance. Eric C. Itsweire and Charles W. Van Atta 423

A nonlinear stability analysis of the Bénard–Marangoni problem. A. Cloot and G. Lebon 447

Review

Vortex Motion, edited by H. G. Hornung and E. A. Muller 470

Corrigendum 471
